Part III DETAILED ACTION

1. Claims 1-20 are pending.

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1-22-02 has been entered.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-3, 6-9 and 14 stand rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the use of rAsp f4 or rAsp f6, does not reasonably provide enablement for the use of any ABPA related allergen. The specification does not enable any person skilled in the art to which it pertains, or with which it is most clearly connected, to use the invention commensurate in scope with these claims.

Applicant's arguments filed 8-12-02 have been fully considered but are not found persuasive.

Applicant argues that their claims are limited only to those ABPA related antigens which can discriminate with 100% specificity between ABPA and allergic sensitization to A. Fumigatas. Applicant further argues their specification teaches how one of skill in the art could readily identify a practice additional compounds when practicing their claimed invention.

However, when considering the breadth of the claim which reads upon a limitless number of ABPA related antigens, Applicant disclosure of only two antigens which were capable of meeting their claim limitations and the prior art recognition that additional ABPA related do not discriminate with 100% specificity, it would be unpredictable as to whether any other antigens meet Applicant's claimed limitation thereby making the scope of the claimed invention non-enabled.

4. Applicant is notified that claims 4-5, 10-13 and 15-20 are free of the prior art as of the last art search.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire THREE MONTHS from the date of this action. In the event a first response is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.
